

WHAT MAKES AN ENGAGING OPPORTUNITY?

Posting an Opportunity on Crowdhelix is the most effective way of finding suitable prospective collaborators from across the Crowdhelix Network and beyond. Once submitted by a member, Opportunities are reviewed by Crowdhelix's team of community managers before being published on the platform.

Following publication on our platform, relevant members among our network of over 16,500+ relevant collaborators are sent notifications based on their chosen notification preference.

01. BE RELEVANT

Crowdhelix members can publish opportunity posts in up to three of our 50+ Helix communities.

Some Helix Communities will be more relevant than others, so make sure to identify up to three appropriate helixes.

Based on your preferences, our system will identify and recommend additional Helixes that may be relevant to your opportunity.

02. BE CONCISE

Make sure that the title of your opportunity post can be easily understood by all Crowdhelix members.

Remember, opportunity posts are viewed by a diverse audience that encompasses researchers, innovators, business leaders and investors.

You can provide a greater level of detail in the post description, but you must first engage prospective collaborators with a succinct title.

03. MAXIMISE OUR AI TECHNOLOGY

Crowdhelix's intelligent recommender system will analyse the text included in your description to generate suggestions for prospective collaborators.

To maximise the potential of our technology, specify what you hope to achieve from the collaboration (e.g. a project proposal) and be clear about what expertise you're seeking.

04. VISIBILITY

You can toggle settings that allow you to choose how widely you wish your opportunity to be shared among Crowdhelix members.

Posts can even be shared among the general public if you wish, but you must let us know first.

You can do this before you submit your post for approval in a menu titled Visibility.

05. UPLOAD AN ATTACHMENT

You can include an attachment in your post if you wish to share specific details or any information that might be relevant.

Just remember that attachments are limited to 5MB.
